RS 6+

FROM THE RACETRACK TO THE ROAD.

ABT[®]

THE ABT RS6+

STRICTLY LIMITED AND A CLEAR PLUS.

Our engine specialists have always been good at adding on and deliver visually appealing fireworks – inside and outside – in addition to another power boost. The result is called the ABT RS6+ and is **built as an exclusive complete vehicle in a limited edition of only 50**, indicated by a serially numbered badge on each car. The heart of the ambitious project is the performance boost, which uses the specially developed ABT Power S power stage. And the formula works – the power was increased to **705 hp (519 kW)** as well as **880 Nm**. The performance version of the Audi RS6 comes with 605 hp (445 kW) at 700 Nm, making it the most powerful series version of the Bavarian car manufacturer.

You will find more about the family sports car on the following pages or in our video on www.abt.digital/RS6_Action

You will find all relevant information about the ABT RS6+ on http://bit.ly/RS6_Info

Of course our ABT SPORT GR alloy wheels perfectly match the dark carbon fiber look of the new add-on parts: front lip, front bumper add-ons, mirror covers, side skirt and rear bumper add-ons as well as the rear spoiler are also designed with visual carbon. This is completed by wheel arch vents – after all, this type of car tends to end up with “hot wheels”. Thus, most people will only see the ABT RS6+ from behind, looking at its attractive carbon double tailpipe trims. These are the visual icing on the cake for an exhaust system that really packs a punch. In addition to the specially developed control unit, we now also use a complete stainless steel exhaust system for our power packages.

For all car fans who are more interested in inner values, we as the worldwide leading VW and Audi tuner also offer a comprehensive leather and carbon interior from our Individual range. This allows the elegant and sporty RS6+ to set new standards in this sector as well. The scope of delivery also includes dashboard and seat panels made of carbon fiber as well as a steering wheel design in carbon and leather. Other cool gimmicks are a gearshift lever badge, floor mats with the RS6+ logo, a matching trunk mat as well as the fascinating integrated entrance light which casually projects the RS6+ logo onto the floor. This extravagant Avant is therefore definitely not short of plus points.

RS6+	ABT POWER S	ABT POWER R (optional*)
4.0 TFSI top speed acceleration 0-100 km/h	519 kW (705 HP), 880 Nm 320 km/h 3,4 sec	541 kW (735 HP), 920 Nm 320 km/h 3,3 sec
